Secret Service Makes Public Some Interesting Statistics.

COUNTERFEITERS CAPTURED

MOST OF THE OFFENDERS WERE OF AMERICAN BIRTH.

ASHINGTON, July 2.- The annual report of Chief Wilkie of the secret service division, submitted today to Secretary Shaw, shows that during the year there were arrested 573 persons charged with various offenses against the federal statutes, New York leading, with eighty-five prosecutions. Of the offenders 413 were of American birth, the next largest number of ofbirth, the next largest number of of-fenders being Italians. Sixty-three per cent of those arrested were convicted. During the fiscal year but one dan-gerous spurious note was put in circu-lation, while there was only one other even passable counterfeit, a \$1 silver certificate, whose makers, with their complete plant, were captured in Chi-cago the same day they attempted to put one of their notes into circulation. In the New York district the circula-In the New York district the circula-on of "all silver" counterfeit coins has ced more than 80 per cent, as pared with the previous year. Reference is made to the continued activity among criminals who make the "raising" of notes a specialty, and it is pointed out that this crime might be prevented by the adoption of a distinctive size for the notes of smaller deminations—the ones and twos to be, say, an inch shorter and one-half inch narrower than those of \$5 or over.

If impatience or fault-finding are ever excusable it is when the body is tortured by an eating and painful sore. It is truly discouraging to find after months of diligent and faithful use of external remedies that the place

remains as defiant, angry and offensive as ever. Every chronic sore, no matter on what part of the body it comes, is an evidence of some previous constitutional or organic trouble, and that the dregs of these diseases remain in the system; or, it may be that some long hidden poison-perhaps Cancer—has come to the surface and begun its destructive work.
